Summary:

Self-motivated JavaScript developer with hands-on experience and passion for creating functional, scalable and mobile-responsive web applications with intuitive UI & UX. Seeking a junior developer role in a reputed firm to enhance my programming skills and to showcase my expertise in problem solving, project management and process improvement.

Technical Skills:

Programming languages: HTML5, CSS, JavaScript (ECMA 6).
JS Frameworks/Packages: NodeJS, ReactJS, Express.js, Bootstrap, Material UI, GraphQL, Handlebars, Inquirer, Jest, Moment.js, Sequelize, Mongoose, Bcrypt, JSON web tokens, express-session.
Databases & Hosting platforms: MySQL, MongoDB, GitHub, Heroku, Netlify.

Projects:

CAMPUS CONNECT – MERN STACK | NOSQL – ODM | PWA

https://github.com/vsjanarthani/campus-connect.git | https://jana-campus-connect.herokuapp.com/
Web application with Chat feature to connect Coding Bootcamp Alumni for networking purposes.

- **Technologies:** React, Mongo DB, Node.js (Apollo Server Express, WebSocket and Subscriptions, GraphQL, Mongoose, Material UI, Bcrypt, JSON web tokens), service worker, Web Manifest, JavaScript (ES6), CSS3.
- **Role:**
  ▪ Worked in collaboration with a team of 5 in all phases of development, focusing on Agile methodologies, coding, testing, and debugging.
  ▪ Tracked the project progress using GitHub Projects – Kanban board model.
  ▪ Pair-Programming with another web developer to integrate front-end and back-end.

POKEMON DRAFT – FULL STACK | MVC ARCHITECTURE | REST API | SQL - ORM

https://github.com/vsjanarthani/fullstack-pokemon-game.git | https://pokemon-fullstack.herokuapp.com/
Web Application with a fun game that enables the users to draft 6 Pokémon to their team and compare their team with friends to see who has the strongest team.

- **Technologies:** MySQL, Node.js (Sequelize, Express, Handlebars, node-fetch, Bcrypt, Socket.io) JavaScript (ES6), Bootstrap, PokeAPI and CSS.
- **Role:**
  ▪ Remotely collaborated with a team of 4 throughout the development life cycle, proactively tracking the project progress and scheduling team meetings when necessary.
  ▪ Worked closely with the team to resolve issues and troubleshoot.
  ▪ Incorporated the best practices such as keeping the code DRY, Modularized and Readable.

WORD SEARCH – FRONT-END | THIRD-PARTY API

https://github.com/vsjanarthani/word-search.git | https://vsjanarthani.github.io/word-search/
Dictionary-like web application that provides definition, reference and examples for a searched English word. The app also has Google page translation and a fun word association quiz.

- **Technologies:** JavaScript (ES6), Third-party APIs, Semantic HTML and CSS.
- **Role:**
  ▪ Led a team of 5 remotely to develop, debug, and deploy the web application.
  ▪ Planned and designed the Wireframe for the project using Balsamiq Wireframes.
  ▪ Ensured through documentation as a SCRUM Master and incorporated Mobile First Design Approach.
